GREENS**

## OPPOSE THE LIBERAL'S "GROWTH AT ANY COST"

These plans are very short on job creation ideas and fail to recognise the need for new industries such as those developing renewable energy technologies.

## PROTECT THE ENVIRONMENT & RESPOND TO CLIMATE CHANGE

The government's abysmal performance with the environment in its blind search for economic growth is a serious threat to our coastal community.

## RECTIFY EDUCATION, HEALTH FUNDING & SOCIAL SPENDING

Underfunding of education, TAFE and community services undermines our capacity to prepare for the world and provide equal opportunities for all.

*“ I am committed to campaigning for Clean Politics, a Clean Earth and a return to Empowered Communities. As former manager with the National Parks and Wildlife Service and Environmental Scientist with Sydney Water, I am a seasoned campaigner for environmental protection.*

*Many years of volunteering on the South Coast places me in a great position to help the community in so many other ways including: Combatting the “growth at any cost” plans of the state government; Greater equity in education funding; Revitalisation of TAFE; Greater funding for mental health and community legal aid services; and Increased access to affordable housing.”*
